

LAMPE CABANON

Le Corbusier

In 1952, on the shores of the French Riviera, Le Corbusier built “Cabanon”: the absolute archetype of essential living. The project, executed according to the rules of the Modulor, is found just a stone’s throw away from the sea and served as a refuge for the architect in his final years. Lampe Cabanon, named after the inspired microcosm, represents a symbol of architecture, design, production, and essential living. The lampshade, made from sandpaper that the architect used, was crafted from a wartime artifact – a mortar shell carrier – found on French beaches. The lamp, for which numerous sketches and designs exist, represents a moment of rebirth in the post-war world.

LAMPE CABANON

LAMPING

Source	E27 A60
Total power	60W
Tension	230V
Color temperature	according to bulb
IP class	IP20
Notes	Cable length 2,5m, dimmable on cable, according to bulb

Codes

CAB ENW 11

Structure

Black zinc/green painted tracing paper sheet

Certificazioni

**UK
CA**
